# To Be

Designer: Gino Carollo

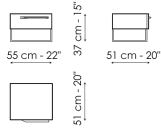

A collection of furnishings for the bedroom, with the capacity “to be”, rather than simply to appear, perfectly at ease in settings with different aesthetics. To Be is a collection consisting of a drawer chest, a bedside table and a highboy that creates an organic design in the bedroom. The structural and formal lightness is derived from two design factors: strict geometric shapes and the choice of the painted metal base, which slims down the unit through a principle of volume subtraction. The To Be night storage units feature a matt lacquered wooden structure, available in three different colours (white, anthracite grey and dove grey), making it possible

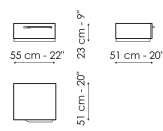

to satisfy a variety of tastes as well as facilitate interesting combinations with the shades of the painted metal base. The metal handles with a matching finish are a continuous feature shared throughout the entire collection. Besides the multiple customisation options, there is also the possibility to have a plinth base version, available in numerous metallic colours which can be mixed or matched with the lacquered wood structure. With great attention to detail in each design, any combination can create a modern, sophisticated atmosphere.
